

ANGELO FLORES

SOFTWARE ENGINEER | FULL STACK, CLOUD & API DEVELOPMENT

(206) 472-4232 | angeloflores88@gmail.com | angelofloresio.vercel.app

PROFILE

Full-stack software engineer experienced in customer-facing search and browse systems, cloud deployment, and production support, with complementary skills in HTML5, CSS, JavaScript, PHP, JPA/Hibernate, SQL, and JSON. Working familiarity with Kotlin and AI-assisted development using ChatGPT Codex and Claude Cowork.

PROFESSIONAL EXPERIENCE

WALMART | Digital Coach | Jan 2023 - Aug 2026

- Led multichannel Walmart.com and mobile-app fulfillment operations for 76 associates through three team leads; increased peak-day digital sales from ~\$35K to \$60K (71%) while supporting 38% year-over-year growth.
- Used dashboards and KPIs for availability, accuracy, timeliness, and first-time pick rate to improve workflows and training.

NORDSTROM | Software Engineer | Seattle, WA | Apr 2019 - Sep 2022

- Built Java/Spring Boot and C#/.NET RESTful API microservices for navigation, search, and product discovery using Maven, Gradle, and Redis caching; led Apache Kafka onboarding for schema-managed events.
- Worked with Apigee Edge and AWS API Gateway, OAuth2, idempotency, and rate limiting; tested and documented APIs using Postman and OpenAPI/Swagger.
- Used Git/Bitbucket, GitLab CI, and GoCD for CI/CD pipeline automation; participated in Agile/Scrum sprint planning and used Jira for documentation and work tracking.
- Deployed and supported AWS EC2, ECS, EKS, RDS, S3, Lambda, and Elastic Beanstalk; worked with Docker, Kubernetes, CloudFormation, Linux, and Tomcat.
- Served as an on-call engineer; monitored availability and performance with Datadog and AWS CloudWatch and used Splunk alerts and logging to resolve incidents. Contributed front-end work during a team rotation.

NORDSTROM | Software Engineer Intern, Computer Vision Platform | Dec 2018 - Apr 2019

- Built a Python/protobuf image-upload endpoint and computer-vision prototypes using NumPy, pandas, scikit-learn, PyTorch, TensorFlow, and GCP.

NORDSTROM | Software Engineer Intern, Product Service | Jun 2018 - Aug 2018

- Delivered Cassandra product data through service endpoints and supported Amazon SQS routing workflows.

INTEGRITY SOLUTIONS LLC | Software Engineer Contractor | Apr 2018 - Jun 2018

- Contributed to on-premises-to-cloud modernization and built a Vue.js front end for a cloud-connected application.

RECENT ENGINEERING PROJECTS

Stagenum | Product Engineer | github.com/atreyhazelhispanic/stagenum | 2026 - Present

- Built a mobile-first TypeScript/React research prototype for milestone-based service work, approvals, invoicing, simulated payments, receipts, and shared project state.
- Designed PostgreSQL-backed architecture with passwordless access, private object storage, Stripe webhook authority, and transactional outbox jobs; documented decisions with ADRs and diagrams.

CareerFlow | Full Stack Developer | careerflow-three-steel.vercel.app | 2026 - Present

- Built a job-search application with Spring Security, JWT, JUnit, Mockito, and GitHub Actions; implemented authenticated APIs, automated tests, and API documentation.

Nordstrom Hackathons | Three-time Participant; First-Place Winner | 2020

- Built a sample-sale app with role-based intake, recommendations, and checkout verification.

Pacific Rim Collegiate Cyber Defense Competition | Saint Martin's University Competitor

EDUCATION

Saint Martin's University | B.S. Computer Science, Software Engineering | 2017 - 2018

Olympic College | A.S. CS, 2013-2016 University of Washington | CS coursework, 2016-2017
